1. Introduction

1.1 Background and purpose of the journal

Journal of the Ethiopian Mathematics Professional Association (JEMPA) is a biannual, open-access, and publishes manuscript from pure, applied, mathematics and related multidisciplinary area publication owned and published by the Ethiopian Mathematics professional association. Journal established to address the pressing need for improved research in pure mathematics, applied mathematics and mathematics educational in Ethiopia and beyond. JEMPA serves as a dynamic platform for researchers, educators, practitioners, and policymakers to engage in scholarly dialogue on quality education and training.

The journal publishes high-quality, peer-reviewed works, including original research articles, review papers, policy briefs, short communications, conference proceedings and case studies. These contributions reflect diverse perspectives and contexts, addressing both national and global issues related to educational quality.

1.2 Target Audience and Stakeholders

The *Journal of Ethiopian Mathematics Professional Association (JEMPA)* serves as the official scholarly outlet of the Ethiopian mathematics professional community. Its primary target audience includes Ethiopian mathematicians, mathematics educators, applied and computational mathematicians, statisticians, and graduate students affiliated with universities, colleges, research institutions, and professional associations.

JEMPA also welcomes contributions from regional and international researchers whose work is relevant to the development and application of mathematical sciences in Ethiopia and beyond. The journal particularly targets professionals working in interdisciplinary areas such as engineering, physical sciences, data science, economics, and technology, where mathematical modeling, analysis, and computation play a vital role.

Key stakeholders of JEMPA include authors, reviewers, editorial board members, the Ethiopian Mathematics Professional Association, higher education institutions, research centers, policy makers, and funding agencies. The journal is committed to promoting capacity building, supporting early-career researchers and mathematics educators, and fostering collaboration between academia, industry, and society. Through ethical publishing practices and rigorous peer review, JEMPA aims to strengthen the mathematics profession and contribute to national development and global mathematical scholarship.

2. Aims and Scope

The *Journal of Ethiopian Mathematics Professional Association (JEMPA)* aims to promote excellence in mathematical research, education, and professional practice by pub-

lishing high-quality scholarly works that contribute to the advancement of mathematical sciences. The journal provides a platform for disseminating original research, innovative methodologies, and professional insights that address both theoretical developments and practical applications of mathematics. JEMPA seeks to strengthen the mathematics profession in Ethiopia while engaging with the global mathematical community.

2.1 Disciplinary Coverage

JEMPA covers a broad range of disciplines within the mathematical sciences. These include, but are not limited to, pure mathematics, applied mathematics, computational and numerical mathematics, mathematical modeling, statistics and probability, mathematical physics, and interdisciplinary areas where mathematics plays a central role. The journal also encourages contributions in mathematics education, history of mathematics, and professional issues related to the teaching, learning, and application of mathematics.

2.2 Types of Articles Accepted

JEMPA accepts a variety of scholarly contributions, including original research articles, review papers, short communications, case studies, technical notes, and methodological papers. The journal also welcomes high-quality articles on mathematics education, curriculum development, pedagogical innovations, and professional practice. Invited articles, perspective papers, and reports relevant to the activities and interests of the Ethiopian Mathematics Professional Association may also be considered.

2.3 National and International Relevance

While JEMPA places a strong emphasis on research and professional issues relevant to Ethiopia and the broader African context, it maintains an international outlook and welcomes submissions from researchers worldwide. The journal seeks to highlight mathematical research that contributes to national development, capacity building, and policy formulation, as well as studies that address global scientific and technological challenges. By bridging local priorities with international scholarship, JEMPA aims to foster collaboration, knowledge exchange, and global visibility of mathematical research.

The Journal of the Ethiopian Mathematics Professional Association publishes high-quality, peer-reviewed research across the spectrum of mathematics and its applications. The journal aims to advance knowledge, promote scholarly exchange, and support the professional development of mathematicians.

Objectives:

- Encourage innovative research in both theoretical and applied mathematics.

- Promote interdisciplinary studies involving mathematics and other scientific domains.
- Provide a platform for scholarly discussion and dissemination of new ideas and methods.

2.4 Scope of the journal

- **Area:** Includes pure mathematics, applied mathematics, computational mathematics, Mathematics Education, mathematical modeling, and other related disciplines.
- **Target Audience:** Researchers, educators, practitioners, and policymakers who are engaged in mathematical research, teaching, or applied work in industry and academia.
- **Article Types:** Original research articles, review papers, short communications, and invited editorials that contribute to the advancement of mathematical knowledge.

3. Governance and Ownership Policy

3.1 Journal ownership and publisher

3.2 Editorial independence

3.3 Governing bodies and oversight

- Ownership by the Ethiopian Mathematics Professional Association.
- Defined roles of the Editor-in-Chief, Managing Editor, Associate editors and Editorial Board.
- Defined roles and responsibilities of the journal leadership

4. Editorial Structure and Responsibilities

4.1 Editor-in-Chief: role, appointment, term

- **Editor-in-Chief**
  - Provides overall academic and strategic leadership of the journal.
  - Ensures the quality, integrity, and scholarly standards of published articles.
  - Makes final decisions on manuscript acceptance or rejection.

  - Appoints editors and reviewers in accordance with journal policy.
  - Represents the journal at national and international levels.

- *Term Limit:* Appointed for a fixed term of three (3) years, renewable once based on performance and approval of the governing body.

- *Appointment Procedure:*
  - Nominated by the Editorial Board or the Association.
  - Appointed by the governing body of the Association.
  - Appointment based on academic standing, editorial experience, and leadership capability.

4.2 Managing Editor: role and responsibilities

  - Oversees the day-to-day editorial and administrative operations of the journal.
  - Manages manuscript submission, tracking, and communication with authors and reviewers.
  - Ensures adherence to editorial timelines and publication schedules.
  - Coordinates copyediting, proofreading, and production processes.
  - *Term Limit:* Appointed for a renewable term of three (3) years.
  - *Appointment Procedure:*
    * Appointed by the Editor-in-Chief in consultation with the governing body.
    * Selected based on organizational and editorial management skills.

- *Term Limit:* Appointed for a renewable term of three (3) years.

4.3 Associate Editors

  - Handle submitted manuscripts within their specific areas of expertise.
  - Conduct an initial assessment of submissions for relevance, originality, and adherence to journal scope and policies.
  - Select and invite qualified, independent peer reviewers.
  - Monitor the peer-review process and ensure timely completion of reviews.
  - Evaluate reviewer reports and provide recommendations to the Editor-in-Chief regarding editorial decisions.

- Ensure that ethical standards, including conflict of interest and research integrity policies, are upheld throughout the review process.
- Communicate with authors regarding revisions and required clarifications.
- Contribute to the development of journal policies and editorial strategy.
- Promote the journal within the academic and research community.
- *Term Limit:* Appointed for a term of two (2) years, renewable based on performance and journal needs.
- *Appointment Procedure:*
  * Nominated by the Editor-in-Chief or Editorial Board.
  * Appointed based on subject expertise, publication record, and reviewing experience.

4.4 Editorial Board

- Supports the peer-review process by handling manuscripts within their areas of expertise.
- Recommends qualified reviewers and evaluates reviewer reports.
- Advises on journal policy, scope, and strategic development.
- Promotes the journal within the academic community.

- *Term Limit:* Appointed for a term of two (2) years, renewable subject to active participation.
- *Appointment Procedure:*
  - Appointed by the Editor-in-Chief in consultation with the governing body.
  - Selection based on academic merit, research activity, and commitment to the journal.

4.4.1 Advisory Board

The Advisory Board of the journal consists of distinguished national and international scholars who provide strategic guidance and support to enhance the journal's quality, visibility, and academic impact. Advisory Board members do not participate in day-to-day editorial decisions but serve in an advisory and oversight capacity.

4.4.2 Roles and Responsibilities

- **National Advisors**
  - Advise on the relevance of the journal's scope to national research priorities.
  - Recommend topics, themes, or special issues that address local and regional scientific challenges.
  - Support outreach to national research communities to encourage high-quality submissions.
  - Provide guidance on ethical, cultural, and institutional considerations relevant to the local context.
  - Assist in identifying potential reviewers and contributors from national institutions.
- **International Advisors**
  - Provide expertise on global research trends and emerging areas in mathematics and applied sciences.
  - Advise on aligning journal policies with international best practices (COPE, Scopus, DOAJ).
  - Promote the journal internationally and encourage submissions from global researchers.
  - Provide strategic guidance on indexing, open access policies, and cross-border collaborations.
  - Suggest distinguished scholars for the Editorial Board and peer reviewer pool.

4.4.3 Term and Appointment

- Advisory Board members are appointed for a renewable term of two to four years.
- Appointments are made by the Editor-in-Chief in consultation with the governing body.
- Members are selected based on academic reputation, research contributions, and willingness to support the journal's mission.

4.5 Guest Editors (if applicable)

Guest Editors, either individually or as part of a Guest Editorial Team, are appointed by the Editor-in-Chief (EIC) in consultation with the Editorial Board to oversee the development and management of a special issue, topical collection, or thematic section of

the journal. They are not permanent members of the journals standing editorial board; however, they make a vital shortterm contribution by providing specialized expertise, scholarly leadership, and an extended professional network relevant to the chosen theme.

Guest Editors play a crucial role in ensuring the academic rigor, thematic relevance, and overall quality of the special issue. Their main responsibilities include:

1. Concept Development: Proposing a timely, innovative, and academically significant theme for the special issue in alignment with the journals scope and objectives.

2. Editorial Coordination: Collaborating with the Editor-in-Chief and the managing editor to define the special issues focus, objectives, and structure, and to finalize timelines for the call for papers, review process, and publication.

3. Manuscript Management: Supporting the peer review process for all manuscripts submitted to the special issue, ensuring a fair, transparent, and timely review.

4. Quality and Ethical Oversight: Ensuring that all submissions meet the journals ethical and academic standards, including adherence to plagiarism policies, avoidance of conflicts of interest, and maintenance of confidentiality throughout the review process.

5. Decision-Making Support: Evaluating reviewer feedback and providing well-reasoned recommendations to the Editor-in-Chief regarding manuscript acceptance, revision, or rejection.

6. Scholarly Contribution: Contributing to the intellectual quality and cohesion of the special issue by preparing an introductory editorial or overview article that contextualizes the theme and highlights its scholarly relevance.

7. Promotion and Outreach: Actively promoting the special issue through academic networks, professional associations, and relevant conferences to enhance its visibility, readership, and citation impact.

4.6 Editorial Board Policy

The Editorial Board plays a vital role in maintaining the academic quality, integrity, and strategic direction of the journal. The following policies govern the selection, responsibilities, and ethical conduct of Editorial Board members:

- **Selection Criteria:** Members are selected based on their academic reputation, research expertise, publication record, prior reviewing or editorial experience, and ability to contribute to the journals mission.

- **Duties and Performance Expectations:**

  - Support the peer-review process by handling manuscripts within their areas of expertise.
  - Recommend qualified reviewers and evaluate reviewer reports.
  - Advise on journal policy, scope, and strategic development.
  - Promote the journal within the academic community.
  - Actively participate in Editorial Board meetings and discussions.

- **Conflict of Interest Regulations:** Members must disclose any potential conflicts of interest related to manuscripts, authors, or institutions. They must recuse themselves from handling manuscripts where a conflict exists and ensure impartial and ethical evaluation at all times.
- *Term Limit:* Appointed for a term of two (2) years, renewable subject to active participation.

5. Publication Model and Frequency

5.1 Publication frequency

JEMPA is published biannually, with issues released regularly in June and December. To promote a vibrant and diverse academic exchange, the journal accepts a variety of manuscript types, including:

- Full-Length Research Articles
- Review Papers
- Short Communications
- Conference Proceedings

5.2 Issue structure

5.3 Special issues

Special issues focusing on emerging topics or conference-selected papers may be published with the approval of the Editorial Board and under the supervision of designated guest editors.

6. Editorial and Peer-Review Policies

Peer Review Policy Type of peer review (single-blind/double-blind/open) Reviewer selection Review timelines Confidentiality

6.1 Peer Review Policy

The journal ensures that all submitted manuscripts undergo a rigorous and transparent peer review process to maintain the highest academic standards. The peer review policy outlines the review model, reviewer requirements, timelines, and confidentiality standards.

- **Review Model:** The journal may adopt one of the following models:
  - *Single-blind:* Reviewers know the authors' identities, but authors do not know the reviewers.
  - *Double-blind:* Both reviewers and authors remain anonymous to each other.
  - *Open review:* Identities of both authors and reviewers are disclosed.
- **Number of Reviewers:** Each manuscript is evaluated by a minimum of two independent expert reviewers, selected based on their expertise and absence of conflicts of interest. In cases of high-impact or complex papers, additional reviewers may be assigned.
- **Review Timeline:** Reviewers are requested to submit their evaluations within a specified period (typically 24 weeks). Timely feedback is critical to maintaining the efficiency of the publication process.
- **Confidentiality:** All manuscripts and related materials are treated as confidential. Reviewers must not share or use information contained in the manuscript for personal gain or research prior to publication.

6.2 Reviewer Guidelines

Reviewers play a critical role in maintaining the quality, integrity, and credibility of the journal. The following guidelines outline their responsibilities and expected conduct.

- **Evaluation Criteria:** Reviewers should assess manuscripts based on originality, scientific accuracy, clarity, relevance to the journals scope, and methodological rigor. Constructive suggestions for improvement should be provided where applicable.
- **Objective and Constructive Evaluation:** Reviews must be impartial, fair, and free from personal bias. Feedback should be clear, specific, and aimed at helping authors improve their work.
- **Confidentiality:** Manuscripts under review are confidential documents. Reviewers must not share, copy, or use the content for personal or professional advantage prior to publication.

- **Disclosure of Conflicts of Interest:** Reviewers must promptly declare any potential conflicts of interest with the manuscript, authors, or institutions, and recuse themselves from reviewing if a conflict exists.

6.3 Editorial Decision-Making

The editorial team is responsible for making fair, timely, and transparent decisions on all submitted manuscripts. Decisions are based on reviewer reports, journal policies, and ethical standards.

- **Decision Types:**
  - *Acceptance:* Manuscript is approved for publication without further revisions.
  - *Minor Revision:* Manuscript requires small modifications or clarifications before acceptance.
  - *Major Revision:* Manuscript requires substantial changes; authors must resubmit for a second round of review.
  - *Rejection:* Manuscript is not suitable for publication due to lack of originality, methodological flaws, or failure to meet journal standards.
- **Decision Authority:** The Editor-in-Chief makes the final decision on all manuscripts, considering the recommendations of Associate Editors and peer reviewers.
- **Appeals Process:** Authors may appeal an editorial decision by submitting a written request within a specified period (e.g., 24 weeks). Appeals are reviewed by the Editor-in-Chief or an independent editorial committee. Decisions on appeals are final.

7. Editorial Decision-Making and Appeals

7.1 Decision categories

7.2 Final decision authority

7.3 Appeals process

8. Author Guidelines and Submission Policies

Submission requirements Manuscript preparation and formatting Authorship criteria Acknowledgment of sources

8.1 Instructions for Authors

- Manuscripts must follow the journal formatting and structure.
- Submissions must be written in clear academic English.
- References must follow the journal citation style.
- Authors are required to use the official LaTeX template.

8.2 Open Access, Copyright, and Licensing Policy

The journal follows an Open Access (OA) model to make published research freely available to the global community, promoting knowledge dissemination, transparency, and impact. All articles are accessible without subscription or paywall. At the same time, authors rights are protected through clear copyright and licensing rules.

- **Access Type:** All articles are published under Open Access, allowing anyone to read, download, and share the content freely.
- **Copyright Ownership:** Authors retain copyright of their work unless otherwise agreed. The journal requires a license to publish the work.
- **Licensing Type:** Articles are published under a Creative Commons license (e.g., CC BY 4.0), permitting reuse, distribution, and sharing with proper attribution to the original authors.
- **Article Processing Charges (APC):** Authors may be required to pay APCs to cover editorial and production costs. APCs are communicated clearly before acceptance.
- **Fee Waivers:** Waivers or reductions may be granted for authors from low-resource institutions, early-career researchers, or countries with limited funding.
- **Author Rights and Compliance:** Authors may reuse and distribute their work according to the chosen license terms. The journal ensures compliance with international Open Access guidelines, funding agency requirements, and indexing standards (e.g., DOAJ, Scopus).

9. Publication Ethics and Research Integrity

Ethics and malpractice statement Plagiarism policy Duplicate submission Research misconduct Retraction and correction policy

9.1 Ethics and Malpractice Statement

JEMPA adheres to the principles of the Committee on Publication Ethics (COPE). All authors, reviewers, and editors are expected to comply with ethical standards in scholarly publishing.

9.2 Definition of Misconduct

Research and publication misconduct includes, but is not limited to:

- **Plagiarism:** Presenting another persons work, ideas, text, equations, figures, or results as ones own without proper acknowledgment.
- **Data Fabrication or Falsification:** Making up data or manipulating research data, numerical results, or computational outputs such that the research record is distorted.
- **Duplicate Submission and Redundant Publication:** Submitting the same or substantially similar manuscript to more than one journal simultaneously or publishing overlapping content without proper disclosure.
- **Unethical Authorship Practices:** Including individuals who did not make a significant contribution (gift authorship), excluding qualified contributors (ghost authorship), or misrepresenting author contributions.
- **Citation Manipulation:** Excessive or inappropriate self-citation or coercive citation practices intended to artificially inflate citation metrics.
- **Misuse of Artificial Intelligence:** Undisclosed or unethical use of AI tools that compromises originality, transparency, or authorship responsibility.

9.3 Plagiarism Policy

- All manuscripts are screened for similarity. similarity threshold, screeening tools, consequences
- Plagiarism, including self-plagiarism, is unacceptable.
- Confirmed misconduct may result in rejection or retraction.

9.4 Conflict of Interest Policy

The *Journal of the Ethiopian Mathematics Professional Association (JEMPA)* is committed to maintaining transparency, objectivity, and integrity in all aspects of the publication

process. A conflict of interest (COI) arises when personal, professional, financial, or institutional relationships could inappropriately influence, or be perceived to influence, an individuals judgment or actions.

All participants in the publication process including authors, reviewers, and editors are required to disclose any actual or potential conflicts of interest.

9.4.1 Conflict of Interest for Authors

Authors must disclose all relationships or interests that could be viewed as potential conflicts of interest. These include, but are not limited to:

- Financial interests such as grants, funding, consultancies, honoraria, employment, or patents related to the submitted work.
- Personal or professional relationships that could influence the interpretation or presentation of results.
- Institutional affiliations that may benefit from the publication of the manuscript.

All disclosed conflicts must be clearly stated in a dedicated *Conflict of Interest Statement* within the manuscript at the time of submission. If no conflict exists, authors must explicitly declare:

> "The authors declare no conflict of interest."

Failure to disclose relevant conflicts may result in manuscript rejection, retraction of published articles, or notification of the authors institutions.

9.4.2 Conflict of Interest for Reviewers

Reviewers must evaluate manuscripts objectively and impartially. Reviewers should decline to review a manuscript if a conflict of interest exists or may reasonably be perceived to exist, including:

- Recent collaboration, co-authorship, or close professional association with one or more of the authors.
- Personal relationships, academic competition, or supervisory relationships with the authors.
- Financial or institutional interests that could affect the review process.

Reviewers who identify a potential conflict after agreeing to review a manuscript must immediately notify the handling editor. Confidentiality of the manuscript must be maintained at all times, regardless of whether the review is completed.

9.4.3 Conflict of Interest for Editors

Editors are responsible for ensuring fair and unbiased editorial decisions. Editors must recuse themselves from handling a manuscript if they have any conflict of interest, including:

- Authorship or recent collaboration with the authors.
- Employment at the same institution as one or more of the authors.
- Personal, professional, or financial relationships that could influence editorial judgment.

In cases where an editor has a conflict of interest, the manuscript shall be assigned to an independent editor or a member of the editorial board without conflicting interests. Editorial decisions must be based solely on the scientific merit, originality, and relevance of the manuscript.

9.4.4 Management of Conflicts of Interest

The journal will take appropriate measures to manage disclosed conflicts of interest, which may include:

- Publication of disclosed conflicts alongside the article.
- Reassignment of reviewers or editors.
- Additional independent peer review.
- Retraction or correction of published articles in cases of undisclosed conflicts.

This policy is aligned with the guidelines of the Committee on Publication Ethics (COPE) and is subject to periodic review by the Editorial Board to ensure continued relevance and effectiveness.

10. Data Availability and Reproducibility Policy

Data Availability and Reproducibility Data access and retention Computational codes and materials Repositories and transparency

The *Journal of the Ethiopian Mathematics Professional Association (JEMPA)* is committed to promoting transparency, reliability, and reproducibility of published research. Authors are required to ensure that numerical data, computational codes, and simulation results supporting their manuscripts are clearly documented, accessible, and reproducible by independent researchers.

This policy applies to all submissions involving numerical experiments, computational modeling, simulations, or data-driven analysis.

10.0.5 Numerical Data Availability

Authors must retain and, where possible, make available all numerical data generated or analyzed during the study. This includes, but is not limited to:

- Tabulated numerical results used to generate figures and tables.
- Parameter values, initial and boundary conditions, and discretization details.
- Post-processed data derived from simulations or numerical solvers.

When data sharing is restricted due to legal, ethical, or institutional constraints, authors must clearly state the reason for the restriction and describe how the data may be accessed upon reasonable request.

10.0.6 Computational Codes and Algorithms

For studies involving numerical methods, algorithms, or computer simulations, authors are strongly encouraged to provide access to the computational codes used in the research. This includes:

- Source codes written in programming languages such as MATLAB, Python, Fortran, C/C++, Mathematica, or similar platforms.
- Scripts used for preprocessing, numerical solution, and postprocessing.
- Descriptions of numerical schemes, solvers, convergence criteria, and error control techniques.

If full code sharing is not feasible, authors must provide sufficient algorithmic detail in the manuscript or supplementary materials to allow independent reproduction of the results.

10.0.7 Simulation Reproducibility

Simulation-based studies must be described in sufficient detail to ensure reproducibility. Authors are required to report:

- Governing equations and constitutive models.
- Numerical methods and discretization strategies.
- Grid or mesh resolution and domain size.
- Time-stepping methods and convergence tolerances.

- Validation or benchmark comparisons, where applicable.

Simulation results should be reproducible using the information provided in the manuscript and accompanying materials.

10.0.8 Data and Code Repositories

Authors are encouraged to deposit numerical data and codes in recognized repositories, such as:

- Institutional repositories.
- Public repositories that support long-term access and version control.
- Repositories that provide persistent identifiers (e.g., DOIs).

The location of deposited materials must be clearly indicated in a dedicated *Data Availability Statement* included in the manuscript.

10.0.9 Author Responsibilities

Authors are fully responsible for the accuracy, integrity, and reproducibility of their published results. The use of third-party codes or software must be properly cited, and any modifications must be clearly described.

Failure to comply with this policy may result in manuscript rejection, requests for additional clarification, or post-publication corrections or retractions.

10.0.10 Editorial and Reviewer Considerations

Editors and reviewers may request access to numerical data, codes, or supplementary materials during the review process for verification purposes. All shared materials will be treated confidentially and used solely for evaluation of the manuscript.

This policy is aligned with international best practices in open and reproducible research and is subject to periodic review by the Editorial Board.

10.1 Authorship and Contributions

- Authorship must reflect significant intellectual contribution.
- All listed authors share responsibility for the content.

10.2 Journal Operations and Technical Documents

These keep the journal running smoothly. Publication Frequency Policy Annual / biannual / quarterly Archiving and Preservation Policy Digital backup Institutional repositories Indexing and Abstracting Strategy Document Local, regional, international databases Language and Editing Policy English only or bilingual Copyediting standards

10.3 Templates and Forms

The journal provides standardized templates and forms to facilitate manuscript submission, review, and publication processes. These documents ensure consistency, transparency, and compliance with journal policies.

- **Manuscript LaTeX Template** A structured template for authors to prepare manuscripts according to the journals formatting and style requirements.
- **Cover Letter Template** A standard template guiding authors to submit a professional cover letter, including manuscript title, author information, and statement of originality.
- **Reviewer Report Form** A structured form for reviewers to provide evaluations, recommendations, and comments on manuscripts.
- **Copyright Transfer / License Form** A form to transfer copyright or grant publication license to the journal while outlining author rights and permissions.
- **Author Declaration Form**
  - Confirms the originality of the submitted work.
  - Affirms that the manuscript is not under simultaneous submission to any other journal.
  - Confirms adherence to ethical standards, including proper attribution of all sources.

11. Artificial Intelligence (AI) Policy

Artificial Intelligence (AI) Policy Permitted use of AI tools Prohibited use of AI tools Disclosure requirements AI use by reviewers and editors

11.1 Permitted Use of AI Tools

- Language editing and grammar checking.
- Code formatting or debugging, with disclosure.

11.2 Prohibited Use of AI Tools

- Generation of original mathematical proofs without verification.
- Fabrication of data, theorems, or references.

11.3 AI Disclosure Requirement

Authors must disclose:

- The name of the AI tool used.
- The purpose of its use.
- Confirmation that all results were independently verified.

11.4 AI Use by Reviewers and Editors

- Manuscripts must not be uploaded to AI tools that store data.
- AI tools must not replace human editorial judgment.

11.5 AI and Mathematical Integrity

- AI systems cannot be listed as authors.
- Proofs, derivations, and simulations must be reproducible.
- Human intellectual contribution is mandatory.

12. Open Access, Copyright, and Licensing

Open access model Copyright ownership Licensing terms Article processing charges and waivers

13. Privacy and Confidentiality Policy

13.1 Handling of personal data

13.2 Reviewer and author confidentiality

14. Journal Operations and Technical Policies

Archiving and preservation Indexing and abstracting strategy Language and copyediting standards

- Publication frequency: annual, biannual, or quarterly.
- Digital archiving and preservation policy.
- Indexing and abstracting strategy.
- Language and copyediting standards.

15. Templates, Forms, and Supporting Documents

Manuscript template Cover letter template Reviewer report form Author declarations

16. Disclaimer and Editorial Independence

Liability disclaimer Statement of independence

17. Final Provisions

Policy review and amendment Approval authority Effective date

17.1 Disclaimer / Editorial Independence

All articles published in the Journal, including editorials, represent the opinions of the authors and do not necessarily reflect the views of the Editorial Board, the Editor-in-Chief, or the institutions with which the authors are affiliated, unless explicitly stated.

The journal maintains editorial independence and ensures that the publication of content is based solely on scholarly merit and compliance with journal policies, ethical standards, and peer-review recommendations.

18. Final Provisions

These policies are subject to periodic review and revision by the Editorial Board to maintain alignment with international publishing standards and technological developments.
